

The background of the advertisement is a composite image. At the top, a silhouette of a Bronto Skylift is shown against a dark purple and blue twilight sky. Below this, a city skyline at night is visible, with numerous lights from buildings and streets. Overlaid on the city are many vertical lines of various colors (blue, purple, pink) that extend upwards, some ending in small glowing dots. These lines represent data points or connections. At the bottom, a network of these lines is shown, creating a complex web of connections across the city's layout.

# Bronto One customer portal

Do you struggle with multiple systems and getting an overall grasp of fractioned data? You can now get a full visual overview of your resources, performance and abilities with the cloud-based portal Bronto One.

Bronto One is a single point of entry to Bronto Skylifts aftersales services anywhere in the world.

# Bronto One customer portal

All Bronto aerals equipped with a modem are fully connected to Bronto One. However, fleets often include other types of equipment, and having only one manufacturer's unit in your fleet management system is like trying to complete a puzzle without all the pieces.

## One for all, all for You

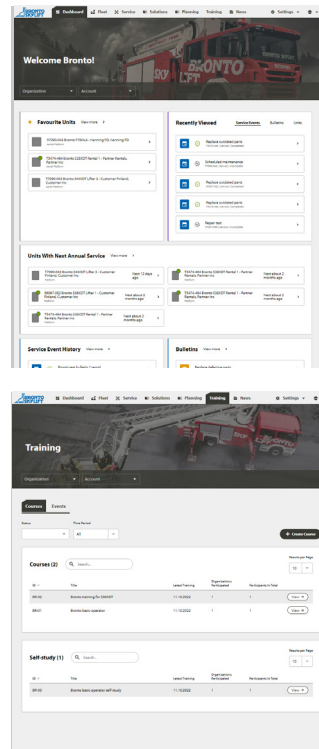

Bronto One welcomes every manufacturer's units and equipment, so it really does provide a full picture of your fleet. As Bronto One has an open interface, it can also be easily integrated with other systems.

## Monitor and optimise

Bronto One has all the essential features of fleet management software. You can use it to monitor and optimise usage and performance with realtime data, as well as to plan maintenance. It has never been easier to gain insights into your equipment.

## Learn and get support

You can manage all personnel training logs, certifications and training materials in Bronto One. If you face an issue with your Bronto aerial, you have access to a solution centre with hundreds of solutions and guidance for various situations.
